

**Electric Portable Pipe Beveling Machine**

## Electric Portable Pipe Beveling Machine

- 1) One man operation
- 2) No torque reaction
- 3) Light and compact
- 4) No need for compressed air
- 5) Fast and secure clamping in pipe

### Machine Operation

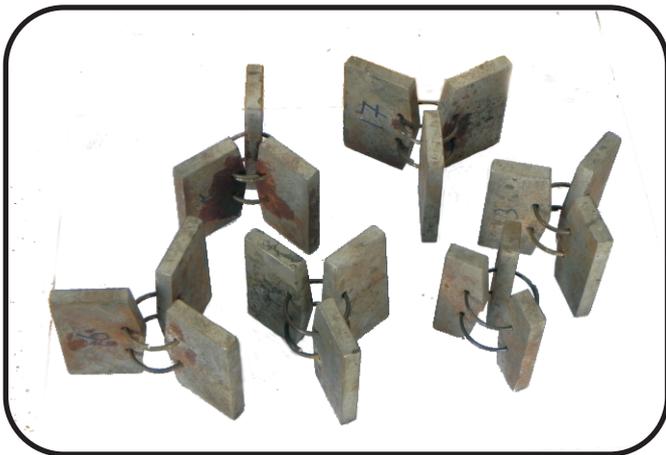

The collet of the machine is placed in the ID of the pipe (the collet size depends on the ID of the pipe). by tightening the nut behind the feed handle the jaws of the collet expand and clamp on the ID. this gives a very positive and secure grip by turning the feed handle the cutting tools mounted on the cutter head now start beveling the pipe.

### Technical Specification

Machine suitable for 28mm ID to 115mm OD.  
Max pipe thickness of 6mm.  
Feed travel 50mm.  
Input power AC single phase supply.  
Weight 12.5kgs.

### Applications

Boiler manufactures, boiler repair contractors, heat exchangers, condenser, super heater manufactures. specialist welding companies. tube and pipe manufactures process plant manufactures, water plants, high pressure piping systems.
